Homes that are built to last, with a high specification.

Of course, every home is unique. But with a new Story home, you'll discover some elements are shared. Like open plan living areas that radiate light and space. Well-designed kitchens that deliver practicality and durability. Beautifully designed bathrooms and en-suites that take centre stage. Plus with media plates and a centrally located router, our homes are made with modern living in mind. French or bi-fold doors also come as standard, helping to create a seamless link between your home and garden.

What's more, when you buy a new Story home, you have the opportunity to personalise your home even further with our choices, upgrades and optional extras which can be incorporated seamlessly into your new home.

It's not only our high specification that's well considered. Our homes are built with sustainability in mind, with the aim of helping the environment and saving you money.

A new build is more economical to run than an older property, using less energy and producing significantly lower CO₂ emissions, meaning lower running costs.

Energy saving features could include:

- Photovoltaic panels
- High levels of thermal efficiency
- 100% energy efficient lighting

Each home at Longton Grange is built with thermally-efficient building materials, and has a smart meter installed, so you can monitor your energy consumption. This, along with water-saving appliances and an airtight design, will give you all the benefits of a new build home.
