## Description

Comprising an impressive creative space situated on 1st & 2nd floors of this former industrial building. The building benefits from high ceilings as well as excellent natural light & in turn outstanding waterside views across Shoreham Port & along the coast. Accessed at 1st floor level direct from the buildings car park into a communal reception area with access to the 2nd floor via lift or stairs. The 2nd floor space in addition to the views also benefits from an outside area that may be suitable to be used as a roof terrace.

## Location

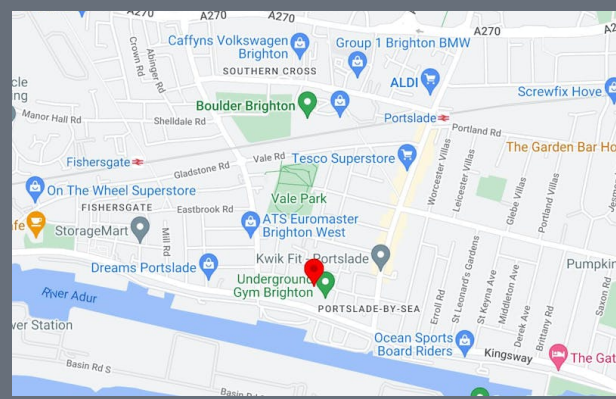

Whilst accessed from North Street, Portslade the building is located on the main A259 Coast Road overlooking Shoreham Port just to the west of Hove. On the ground floor of the property is The Underground Gym a popular local gym group whilst Small Batch Coffee have a roastery & coffee shop a stone's throw away. Portslade Station is a short walk away to the North of the property whilst Shoreham is located to the west.

## Terms

Available by way of a new effective full repairing & insuring lease for a term to be agreed.

## Use

It is thought that subject to obtaining any required consents the property could be suitable for a variety of uses such as, Restaurant, Brewery & Tap Room, Offices, Competitive Socialising, Leisure, Educational or other alternative Health & Fitness.

Property type

Offices and Workshop Businesses

Total floor area

1204 square metres

## Rules on letting this property

**You may not be able to let this property.**

This property has an energy rating of F. The landlord cannot grant a tenancy to new or existing tenants, unless an exemption has been registered.

From 1 April 2023, landlords will not be allowed to continue letting a non-domestic property on an existing lease if that property has an energy rating of F or G.

Properties can be let if they have an energy rating from A+ to E. The [recommendation report](#) sets out changes you can make to improve the property's rating.

## Energy efficiency rating for this property

This property's current energy rating is F.

Properties are given a rating from A+ (most efficient) to G (least efficient).

Properties are also given a score. The larger the number, the more carbon dioxide (CO<sub>2</sub>) your property is likely to emit.

---

## How this property compares to others

Properties similar to this one could have ratings:

If newly built

5 | A

---

If typical of the existing stock

21 | A

---

---

## Breakdown of this property's energy performance

Main heating fuel

Grid Supplied Electricity

---

Building environment

Heating and Natural Ventilation

---

Assessment level

3

---

Building emission rate (kgCO<sub>2</sub>/m<sup>2</sup> per year)

43.34

---

Primary energy use (kWh/m<sup>2</sup> per year)

456

---

## Recommendation report

Guidance on improving the energy performance of this property can be found in the [recommendation report \(/energy-certificate/9375-4372-7106-7557-2812\)](#).

## Contacting the assessor and accreditation scheme

This EPC was created by a qualified energy assessor.

If you are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

If you are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation schemes are appointed by the government to ensure that assessors are qualified to carry out EPC assessments.

---

### Energy rating and EPC

This property's current energy rating is F.

For more information on the property's energy performance, see the EPC for this property.

---

## Recommendations

Make these changes to improve the property's energy efficiency.

Recommended improvements are grouped by the estimated time it would take for the change to pay for itself. The assessor may also make additional recommendations.

Each recommendation is marked as low, medium or high. This shows the potential impact of the change on reducing the property's carbon emissions.

### Changes that pay for themselves within 3 years

Recommendation	Potential impact
Replace tungsten GLS lamps with CFLs: Payback period dependent on hours of use.	High
In some spaces, the solar gain limit defined in the NCM is exceeded, which might cause overheating. Consider solar control measures such as the application of reflective coating or shading devices to windows.	Medium

### Changes that pay for themselves within 3 to 7 years

Recommendation	Potential impact
Add optimum start/stop to the heating system.	Low

### Changes that pay for themselves in more than 7 years

Recommendation	Potential impact
Some walls have uninsulated cavities - introduce cavity wall insulation.	Medium
Some windows have high U-values - consider installing secondary glazing.	Medium
Add weather compensation controls to heating system.	Low
Add local time control to heating system.	Low
Some solid walls are poorly insulated - introduce or improve internal wall insulation.	Medium

## Property and report details

Report issued on	15 September 2022
Total useful floor area	1204 square metres
Building environment	Heating and Natural Ventilation
