HOME REPORT

13 Distillery Houses Caol IIa Isle of Islay PA46 7RJ

ENERGY PERFORMANCE CERTIFICATE

Energy Performance Certificate (EPC)

Scotland

Dwellings

(21-38)

(1-20)

13 Distillery Houses, Caol IIa, Isle of Islay, PA46 7RJ

Dwelling type:	Ground-floor flat
Date of assessment:	12 September 2023
Date of certificate:	18 September 2023
Total floor area:	72 m ²
Primary Energy Indicator:	357 kWh/m²/year

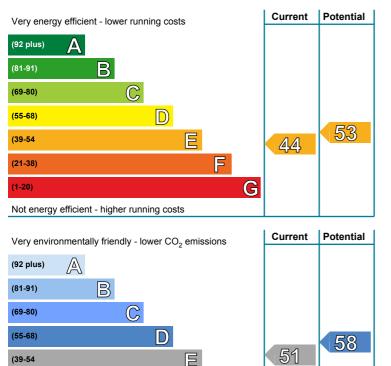

Reference number: Type of assessment: Approved Organisation: Main heating and fuel: 6417-0621-5630-2072-2292 RdSAP, existing dwelling Elmhurst Boiler and radiators, electric

You can use this document to:

- Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO₂ emissions by improving your home

Estimated energy costs for your home for 3 years*	£9,198	See your recommendations
Over 3 years you could save*	£1,392	report for more information

^{*} based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

F

G

Energy Efficiency Rating

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band E (44)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Environmental Impact (CO₂) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO_2) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band E (51)**. The average rating for EPCs in Scotland is **band D (59)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1 Floor insulation (solid floor)	£4,000 - £6,000	£1392.00

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

Not environmentally friendly - higher CO₂ emissions

THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE

Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	Granite or whinstone, with internal insulation Cavity wall, as built, insulated (assumed)	★★★★☆ ★★★★☆	★★★★☆ ★★★★☆
Roof	(another dwelling above)	—	
Floor	Solid, no insulation (assumed)	—	
Windows	Fully double glazed	★★★★☆	★★★★☆
Main heating	Boiler and radiators, electric	****	★★☆☆☆
Main heating controls	Programmer, room thermostat and TRVs	★★★★☆	★★★ ☆
Secondary heating	Room heaters, electric	—	
Hot water	Electric instantaneous at point of use	*****	★★☆☆☆
Lighting	Low energy lighting in all fixed outlets	****	****

The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO₂ emissions, running costs and the savings possible from making improvements.

The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 60 kg CO₂/m²/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 4.3 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 0.6 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

Estimated energy costs for this home

Estimated energy costs for this nome			
	Current energy costs	Potential energy costs	Potential future savings
Heating	£7,458 over 3 years	£6,066 over 3 years	
Hot water	£1,374 over 3 years	£1,374 over 3 years	You could
Lighting	£366 over 3 years	£366 over 3 years	save £1,392
Tota	ls £9,198	£7,806	over 3 years

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

Recommendations for improvement

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

Decembra de dimensiones	Indiantics and	Typical saving	Rating after improvement	
Recommended measures	Indicative cost	per year	Energy	Environment
1 Floor insulation (solid floor)	£4,000 - £6,000	£464	E 53	D 58

Choosing the right improvement package

For free and impartial advice on choosing suitable measures for your property, contact the Home Energy Scotland hotline on 0808 808 2282 or go to www.greenerscotland.org.

energ

About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

1 Floor insulation (solid floor)

Insulation of a floor will significantly reduce heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. Insulating solid floors can present challenges; insulation laid on top of existing solid floors may impact on existing doors and finishes whilst lifting of a solid floor to insert insulation below will require consideration of the potential effect on both structural stability and damp proofing. It is advised to seek advice from a Chartered Structural Engineer or a registered Architect about this if unsure. Further information about floor insulation is available from many sources including www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation. Building regulations generally apply to this work and may also require a building warrant so it is best to check with your local authority building standards department.

Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

LZC energy sources present: There are none provided for this home

Your home's heat demand

In this section, you can see how much energy you might need to heat your home and provide hot water. These are estimates showing how an average household uses energy. These estimates may not reflect your actual energy use, which could be higher or lower. You might spend more money on heating and hot water if your house is less energy efficient. The table below shows the potential benefit of having your loft and walls insulated. Visit https://energysavingtrust.org.uk/energy-at-home for more information.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	6,650	(54)	N/A	N/A
Water heating (kWh per year)	1,247			

About this document

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst (www.elmhurstenergy.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Assessor's name: Assessor membership number: Company name/trading name: Address:	Mr. Donald MacAskill EES/014742 D M Hall Chartered Surveyors LLP The Oban Times Building Corran Esplanade Oban PA34 5PX
Phone number:	0131 477 6000
Email address:	dmhall@dmhall.co.uk
Related party disclosure:	No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.

SINGLE SURVEY

survey report on:

Property address	13 Distillery Houses Caol Ila Isle of Islay PA46 7RJ
------------------	---

Customer Mr Peter MacLean

Customer address	13 Distillery Houses Caol Ila Isle of Islay PA46 7RJ
------------------	---

	Prepared by	DM Hall LLP
--	-------------	-------------

Date of inspection	12th September 2023
--------------------	---------------------

PART 1 - GENERAL

1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property¹.

If the Surveyors have had a previous business relationship within the past two years with the Seller or Sellers Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

To date, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in the expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

¹ Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions. The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to:-

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report² will be from information contained in the Report and the generic Mortgage Valuation Report.

² Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct

1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

1.10 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format;

- the "Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion;
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;
- a "prospective Purchaser" is anyone considering buying the Property;
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and
- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

PART 2 - DESCRIPTION OF THE REPORT

2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- 1. <u>Category 3:</u> Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2. <u>Category 2:</u> Repairs or replacement requiring future attention, but estimates are still advised.
- 3. <u>Category 1:</u> No immediate action or repair is needed.

WARNING:

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value, the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- There are no particularly troublesome or unusual legal restrictions;
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

Description

1. Information and scope of inspection

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities etc. will not be inspected or reported on.

Ground floor flat in a two storey end terraced block containing two

Description	Ground floor flat in a two storey end terraced block containing two flat units.
Accommodation	GROUND FLOOR: Vestibule, hallway, three bedrooms, shower room, lounge/dining/open to kitchen.
Gross internal floor area (m²)	72m ² or thereby, excluding the vestibule.
Neighbourhood and location	The subjects form part of a scattered rural community originally constructed, we understand in conjunction with the nearby Caol IIa Distillery. Limited local facilities but in an area generally perceived as enjoying a high level of natural amenity.
Age	Around 170 years old, and altered and renovated in 1984, as advised.
Weather	Dry and sunny following a recent mixed spell.
Chimney stacks	Visually inspected with the aid of binoculars where appropriate.
	Mutual rendered masonry stack with lead flashings.
Roofing including roof space	Sloping roofs were visually inspected with the aid of binoculars where appropriate.
	Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so from a 3m ladder externally.
	Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property.
	If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and

reasonable to do so.
The roof is pitched and covered with slates. The ridge is fitted with zinc flashing. The roofs over the kitchen and vestibule are also slated.
There was no access to the main roof space and presumably this is from the upper flat. There was no access to the roof space over the kitchen and vestibule.

Rainwater fittings	Visually inspected with the aid of binoculars where appropriate.
	Half round eaves gutters and round section downpipes in PVC design. These shoe onto hardstanding.
Main walls	Visually inspected with the aid of binoculars where appropriate.
	Foundations and concealed parts were not exposed or

inspected.
Rendered masonry with overall wall thickness of around 560mm, where measured, and this is dry lined with plasterboard internally.

Windows, external doors and joinery	Internal and external doors were opened and closed where keys were available.
	Random windows were opened and closed where possible.
	Doors and windows were not forced open.
	PVC framed windows with sealed double glazing.
	The entrance door is a PVC unit with the upper half in sealed double glazing.

External decorations	Visually inspected.
	Paint finishes.

Conservatories / porches	Visually inspected.
	The vestibule lower wall is finished in masonry paint render. The upper wall is of thin construction with PVC cladding with a slate sill at the glazed part. The window areas are PVC framed with sealed double glazing.
	The porch has rendered masonry wall finish under a pitched and slated roof. The windows are PVC framed with sealed double glazing.

Communal areas	Circulation areas visually inspected.
	There is a grassed communal drying green at front and a sloping grassed communal green at the side.

Garages and permanent outbuildings	Visually inspected.
	Small store unit at rear.
Outside areas and boundaries	Visually inspected.

pro	here are garden grounds to the front, side and rear of the operty. This is mostly finished in old concrete hardstanding. The rge ground retaining walls at side and rear are of stone onstruction.
-----	---

Ceilings	Visually inspected from floor level.
	Plasterboard and timber v-joint lining. There is a textured finish to the ceiling in the hallway.

Internal walls	Visually inspected from floor level.
	Using a moisture meter, walls were randomly tested for dampness where considered appropriate.
	Timber stud partitions, and plasterboard finishes.

Floors including sub floors	Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.
	Sub-floor areas were inspected only to the extent visible from a readily accessible and unfixed hatch by way of an inverted "head and shoulders" inspection at the access point.
	Physical access to the sub floor area may be taken if the Surveyor deems it is safe and reasonable to do so, and subject to a minimum clearance of 1m between the underside of floor joists and the solum as determined from the access hatch.
	The floor is of solid construction. There is therefore no sub floor.

Internal joinery and kitchen fittings	Built-in cupboards were looked into but no stored items were moved.
	Kitchen units were visually inspected excluding appliances.
	Timber skirting boards and timber architraves. The pass doors are veneer faced lightweight timber type. There are some glazed paned timber framed pass doors. There are doored wardrobes and a sliding door mirror wardrobe at one of the bedrooms.
	The kitchen is fitted with a range of floor and wall mounted units with a single stainless steel sink and drainer inset in the worktop. There is a tiled splash back to the wall around the worktop.

Chimney breasts and fireplaces	Visually inspected.
	No testing of the flues or fittings was carried out.
	There is a synthetic stone fireplace surround in the lounge. An electric fire is fitted to the original fireplace opening.

Internal decorations	Visually inspected.
	Paint finishes.

Cellars	None.

Electricity	Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.
	Mains supply. The electrical switchgear is fitted at high wall level within the hallway. PVC cabling where visible and 13 amp sockets.

Gas	No mains gas on the island.
Water, plumbing, bathroom fittings	Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.
	No tests whatsoever were carried out to the system or appliances.
	Mains water supply. PVC and copper piping where visible.
	The shower room is fitted with a shower cubicle with mixer shower, pedestal wash hand basin and WC. There is proprietary sheeting and tiles fitted to wall areas.

Heating and hot water	Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.
	No tests whatsoever were carried out to the system or appliances.
	Space heating is a wet system to steel panel radiators and towel rail, fired from an Elektra Compact 12 boiler which is located in the wardrobe at bedroom. This is a combi boiler and heating controls comprise thermostatic radiator valves, a programmer and room stat.

Drainage	Drainage covers etc. were not lifted. Neither drains nor drainage systems were tested. The property is connected to a shared septic tank with neighbour.
Fire, smoke and burglar alarms	Visually inspected. No tests whatsoever were carried out to the system or appliances. Smoke detection is provided. Legislation by the Scottish Government, which took effect from February 2022, requires all residential properties to have a system of inter-linked smoke alarms and heat detectors. Carbon monoxide detectors are also required where appropriate. Purchasers should appraise themselves of the requirements of this legislation, and engage with appropriately accredited contractors to ensure compliance.

Any additional limits to inspection	For flats / maisonettes
	Only the subject flat and internal communal areas giving access to the flat were inspected.
	If the roof space or under-building / basement is communal, reasonable and safe access is not always possible. If no inspection was possible, this will be stated. If no inspection was possible, the surveyor will assume that there are no defects that will have a material effect on the valuation.
	The building containing the flat, including any external communal areas, was visually inspected only to the extent that the surveyor is able to give an opinion on the general condition and standard of maintenance.
	Parts of the property, which are covered, unexposed or inaccessible, cannot be guaranteed to be free from defect.
	I have not carried out an inspection for Japanese Knotweed and unless otherwise stated, for the purposes of the valuation I have assumed that there is no Japanese Knotweed or other invasive plants within the boundaries of the property or in neighbouring properties.
	The report does not include an asbestos inspection. However asbestos was widely used in the building industry until around 2000, when it became a banned substance. If the possibility of asbestos based products has been reported within the limitations of the inspection and you have concerns you should engage a qualified asbestos surveyor. Any such materials should not be drilled or disturbed without prior advice from a licensed specialist.
	Random testing for dampness was undertaken internally with the use of a moisture meter where accessible and considered appropriate.
	The property was unoccupied, furnished and floors were covered. Floor coverings restricted my inspection of flooring. Floor

coverings have not been moved.
Concealed areas beneath and around shower trays were not visible. Water spillage in these areas can often be discovered unexpectedly with resultant damage to concealed parts of the fabric.
The inspection is not a fire or life safety risk assessment and should not be relied on as a risk assessment inspection. Further advice should be sought if a specific risk assessment of the property and building that it forms part of is required.
Where repairs are required at height compliance with Health and Safety legislation often requires the use of scaffolding which can significantly impact on the cost of repair. Pricing repairs is out with the remit of this report but it would be prudent to consider costs and budgeting before offering. The various trades can advise further.

2. Condition

This section identifies problems and tells you about the urgency of any repairs by using one of the following three categories:

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	

Structural movement	
Repair category	1
Notes	The property has been affected by previous movement but within the limitations of the inspection there was no evidence to suggest that this is ongoing. There is cracking to the render at the gable and also at the flue line. The cracking at the former should be monitored. Also refer to our comments at 'Main Walls' below.

Dampness, rot and infestation	
Repair category	1
Notes	No obvious evidence of significant dampness, rot or wood boring insect infestation. External ground levels are high in areas and this can cause penetrating dampness and timber/damp defects. Ground levels should be lowered to a minimum 150mm below internal floor levels. We have assumed that these areas have been appropriately damp proofed/tanked. There was no obvious evidence of dampness internally within the limitations of my inspection at this time.

Chimney stacks	
Repair category	2
Notes	Rendering to the stack is weathered/cracked/breaking. A contractor will be able to advise on the necessary repairs.

Roofing including roof space	
Repair category	2
Notes	Natural slates have an expected lifespan of up to 100 years or more depending on slate quality, source, thickness and cutting skill of the slate. Slates will deteriorate over time; nail fixings will corrode and loosen resulting in on-going

maintenance requirements. Close quarter and disruptive inspections may reveal damage to roofing materials, especially where these are original. Regular maintenance should be anticipated particularly after adverse weather conditions.
We recommend that a reputable roofing contractor be asked to inspect the roof to advise on necessary repairs.

Rainwater fittings	
Repair category	2
Notes	The downpipes shoe onto the hard standing around the external walls. The downpipes should ideally should be connected to underground surface water drain.

Main walls	
Repair category	2
Notes	The rendering of outer walls is cracked and boss in places and can be repaired or replaced by a competent local builder. The cracking at gable should be repaired and sealed at the earliest and monitored.

Windows, external doors and joinery	
Repair category	1
Notes	The seals to older double glazed units often fail resulting in condensation between the panes of glass. Failed sealed units can go undetected in certain weather/daylighting conditions and such failings are not considered to be significant because the window remains functional albeit not as double glazing. This can occur without warning and may only be seen in certain weather conditions

External decorations	
Repair category	1
Notes	Normal maintenance attention applies.

Conservatories/porches	
Repair category	1
Notes	No significant defects evident.

Communal areas	
Repair category	1
Notes	Normal maintenance applies.

Garages and permanent outbuildings	
Repair category	2
Notes	The small outbuilding is old and we noted rotted door and door frame. The internal was not inspected.

Outside areas and boundaries	
Repair category	2
Notes	Defects noted include old concrete hard-standing which is cracked and surface water is lying at the rear yard. The rear ground retaining wall has some cracking at the top stone course. Retaining walls can be expensive to repair. Further advice should be sought from a local builder.

Ceilings	
Repair category	1
Notes	No significant defects evident.

Internal walls	
Repair category	1
Notes	No significant defects evident.

Floors including sub-floors	
Repair category	1
Notes	No significant defects evident. It is not unusual to discover areas of past water spillage when floor coverings are removed in kitchen and shower room compartments, revealing the need for further repair and maintenance work.

Internal joinery and kitchen fittings	
Repair category	2
Notes	No significant defects evident.
	Glazed inserts to interior doors may not be of appropriate toughened glass or meet the recognised Building Standards.
	The sliding doors to the wardrobe at the bedroom containing the boiler are stiff to open and close and need overhaul.

Chimney breasts and fireplaces	
Repair category	1
Notes	Flues should ideally be swept and tested on an annual basis.
	Where fireplaces have been removed there is limited provision for ventilation. Unventilated chimney breasts can result in condensation. Disused chimneys should be capped and vented.
	If disused fireplaces are to be reopened further advice should be sought to ensure that the chimney flue is intact and suitable for use.

Internal decorations	
Repair category	1
Notes	No significant defects evident.
	There is a textured finish at a ceiling area. Refer to our comments about asbestos at 'Limitations to Inspection'.

Cellars	
Repair category	-
Notes	Not applicable.

Electricity	
Repair category	1
Notes	It is recommended that all electrical installations be checked every five years or on change of ownership to keep up to date with frequent changes in Safety Regulations. Further advice will be available from a qualified NICEIC/ SELECT registered Contractor. It should be appreciated that only recently constructed or rewired properties will have installations which fully comply with IET Regulations.

Gas	
Repair category	-
Notes	Not applicable.

Water, plumbing and bathroom fittings	
Repair category	1
Notes	No significant defects evident.
	Seals around the shower tray should be kept well maintained as failure can result in dampness/decay within hidden areas of the property.

Heating and hot water	
Repair category	1
Notes	It is assumed that the heating and hot water systems have been properly serviced and maintained on a regular basis and installed in accordance with the relevant Regulations.

Drainage	
Repair category	1
Notes	No significant defects evident.
	The owner advises that SEPA consent was obtained in 2015 and that a maintenance contract is in place. Further details can be obtained from the seller.

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the previous comments for detailed information.

Structural movement	1
Dampness, rot and infestation	1
Chimney stacks	2
Roofing including roof space	2
Rainwater fittings	2
Main walls	2
Windows, external doors and joinery	1

Chimney breasts and fireplaces	1
Internal decorations	1
Cellars	-
Electricity	1
Gas	-
Water, plumbing and bathroom fittings	1
Heating and hot water	1
Drainage	1

Category 3

Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

Category 2

Repairs or replacement requiring future attention, but estimates are still advised.

Category 1

No immediate action or repair is needed.

Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

3. Accessibility information

Guidance notes on accessibility information

Three steps or fewer to a main entrance door of the property:

In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

Unrestricted parking within 25 metres:

For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin-operated machines.

1. Which floor(s) is the living accommodation on?	Ground floor
2. Are there three steps or fewer to a main entrance door of the property?	Yes X No
3. Is there a lift to the main entrance door of the property?	Yes No X
4. Are all door openings greater than 750mm?	Yes No X
5. Is there a toilet on the same level as the living room and kitchen?	Yes X No
6. Is there a toilet on the same level as a bedroom?	Yes X No
7. Are all rooms on the same level with no internal steps or stairs?	Yes X No
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	Yes X No

4. Valuation and conveyancer issues

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated reinstatement cost for insurance purposes.

Matters for a solicitor or licensed conveyancer

The Building factor should be asked to confirm that there are no planned or outstanding repair schemes for the building containing the flat. The flat may have a common building reinstatement policy.

The subjects form part of a block of flats and it has been assumed that maintenance/repair costs of the common parts of the building will be shared on an equitable basis with adjoining proprietors. It is therefore assumed that the cost of common repairs detailed within the report will be apportioned accordingly although exact liability should be confirmed.

It is understood there are factoring arrangements in place in respect of the maintenance and upkeep of communal areas. This should be verified by the completing conveyancer.

The property has been altered and renovated in 1984. Replacement windows have been fitted relatively recently. It is assumed all necessary Local Authority and other consents have been obtained for alterations and the appropriate documentation, including Building Warrants and Completion Certificates issued. If any works did not require consent then it is assumed they meet the standards required by the Building Regulations or are exempt.

The access road/path appears to be shared. The completing conveyancer should verify rights of access and liability in respect of future maintenance.

The seller advises that past damp/rot treatment works were carried out at a bedroom. Any documentation and guarantee for these works should be obtained and kept with the Title Deeds.

We understand that there is rights of way for bins around the rear and side of the property.

We are advised that drainage is private and shared to a septic tank. The system has not been inspected and condition, legal and environmental issues have not been investigated. For the purpose of this report and valuation all are assumed to be satisfactory.

Estimated reinstatement cost for insurance purposes

£230,000 (Two Hundred and Thirty Thousand Pounds).

It should be noted this sum is an estimate calculated by using a rate per square metre based on information provided by Building Cost Information Service (BCIS).

Valuation and market comments

£155,000 (One Hundred and Fifty Five Thousand Pounds).

Against a backdrop of changing economic circumstances and increasing interest rates, it is not possible to predict how the market will perform in the coming months although market conditions continue to be stable at present

General Remarks

At the time of my inspection the property was unoccupied, furnished and floors were covered. The condition of the property is generally satisfactory consistent with age and type. Elements of the external fabric are ageing and ongoing maintenance and repair is anticipated.

The access road/path appears to be shared. The completing conveyancer should verify rights of access and liability in respect of future maintenance.

The property has been altered and renovated in 1984. Replacement windows have been fitted relatively recently. It is assumed all necessary Local Authority and other consents have been obtained for alterations and the appropriate documentation, including Building Warrants and Completion Certificates issued. If any works did not require consent then it is assumed they meet the standards required by the Building Regulations or are exempt.

We understand that there is rights of way for bins around the rear and side of the property.

We are advised that drainage is private and shared to a septic tank. The system has not been inspected and condition, legal and environmental issues have not been investigated. For the purpose of this report and valuation all are assumed to be satisfactory.

Essential Repairs

None.

PROPERTY QUESTIONNAIRE

Property Questionnaire

PROPERTY ADDRESS:	13 Distillery Houses Caol Ila Isle of Islay PA46 7RJ

SELLER(S):	Peter MacLean Paula MacLean

COMPLETION DATE OF PROPERTY QUESTIONNAIRE:	05/09/23

PROPERTY QUESTIONNAIRE

NOTE FOR SELLERS

- Please complete this form carefully. It is important that your answers are correct.
- The information in your answers will help ensure that the sale of your house goes smoothly. Please answer each question with as much detailed information as you can.
- If anything changes after you fill in this questionnaire but before the Date of Entry for the sale of your house, tell your solicitor or estate agent immediately.

PROPERTY QUESTIONNAIRE Information to be given to prospective buyer(s)

	How long have you owned the property? 8 years, 7 months.
2.	Council Tax
	Which Council Tax band is your property in? B
3.	Parking
	What are the arrangements for parking at your property?
	(Please indicate all that apply)
	Garage
	 Allocated parking space - Yes
	 Driveway - Yes
	Shared parking
	On street
	 Resident permit
	Metered parking
	 Other (please specify):

4.	Conservation Area	NO
	Is your property in a designated Conservation Area (i.e. an area of special architectural or historic interest, the character or appearance of which it is desirable to preserve or enhance)? No	No
5.	Listed Buildings	NO
	Is your property a Listed Building, or contained within one (i.e. a building recognised and approved as being of special architectural or historical interest)?	/No
6.	Alterations / additions / extensions	No
a.	(i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet, or bedroom)?	/No
	If you have answered yes, please describe the changes which you have made:	

	(ii) Did you obtain planning permission, building warrant, completion certificate and other consents for this work?	
	If you have answered yes, the relevant documents will be needed by the purchaser and you should give them to your solicitor as soon as possible for checking. If you do not have the documents yourself, please note below who has these documents and your solicitor or estate agent can arrange to obtain them.	
b.	Have you had replacement windows, doors, patio doors or double glazing installed in your property? <u>If you have answered yes</u> , please answer the three questions below:	Yes
<u></u>	(i) Were the replacements the same shape and type as the ones you replaced?	Yes
	(ii) Did this work involve any changes to the window or door openings?	Yes
	(iii) Please describe the changes made to the windows doors, or patio doors (with approximate dates when the work was completed):	
	Please give any guarantees which you received for this work to your solicitor or estate agent.	

7.	Central heating	
a .	Is there a central heating system in your property? (Note: a partial central heating system is one which does not heat all the main rooms of the property – the main living room, the bedroom(s), the hall and the bathroom). <u>If you have answered yes/partial</u> – what kind of central heating is there?	Yes
	(Examples: gas-fired, solid fuel, electric storage heating, gas warm air.)	
	Electric.	
	If you have answered yes, please answer the 3 questions below:	
b.	When was your central heating system or partial central heating system installed? April 2019	April 2019
с.	Do you have a maintenance contract for the central heating system? <u>If you have answered yes</u> , please give details of the company with which you have a maintenance agreement:	No

I. V	When was your maintenance agre (Please provide the month and yea	ar).	
3. 1	Energy Performance Certificate		
	Does your property have an Certificate which is less than 10 y	Energy Performance ears old?	No
9.	Issues that may have affected yo	ur property	
a.	Has there been any storm, flood, damage to your property while yo	fire or other structural ou have owned it?	No
	<u>If you have answered yes</u> , is the any outstanding insurance claim	damage the subject of ?	No
b.	Are you aware of the existence o property?	f asbestos in your	No
	<u>If you have answered yes, please</u>	e give details:	
10.	Services		
a.	Please tick which services are componently and give details of the services are componently are componen	onnected to your supplier:	
	Services Connected	d Supplier	
	Gas / liquid petroleum gas		

Water mains / private water supply	X	Scottish Water	
Electricity	x	OVO	

	Mains drainage	X		
	Telephone	X	BT	
	Cable TV / satellite	X	SKY	
	Broadband	X	BT	
b.	Is there a septic tank	system at you	r property?	Yes
	<u>If you have answered</u> questions below:			Shared with neighbou rs.
c.	Do you have appro from your septic tan	priate consent k?	ts for the discharge	Yes, Dated 2005.

	Do you have a maintenance contract for your septic tank?	Yes
	If you have answered yes, please give details of the company with which you have a maintenance contract:	
	Don't know – managed by a neighbour on behalf of the remainder of users.	
11.	Responsibilities for Shared or Common Areas	
11. a.	Responsibilities for Shared or Common Areas Are you aware of any responsibility to contribute to the cost of anything used jointly, such as the repair of a shared drive, private road, boundary, or garden area?	Yes
	Are you aware of any responsibility to contribute to the cost of anything used jointly, such as the repair of a	Yes
	Are you aware of any responsibility to contribute to the cost of anything used jointly, such as the repair of a shared drive, private road, boundary, or garden area?	Yes

C.	Has there been any major repair or replacement of any part of the roof during the time you have owned the property?	Νο
d.	Do you have the right to walk over any of your neighbours' property - for example to put out your rubbish bin or to maintain your boundaries? <u>If you have answered yes</u> , please give details: Not applicable.	Yes, although not applicabl e.
е.	As far as you are aware, do any of your neighbours have the right to walk over your property, for example to put out their rubbish bin or to maintain their boundaries? <u>If you have answered yes</u> , please give details: Common area behind each house.	Yes

f.	As far as you are aware, is there a Public Right of Way across any part of your property? (A Public Right of Way is a way over which the public has a right to pass, whether or not the land is privately-owned.) <u>If you have answered yes</u> , please give details:	Νο
12.	Charges associated with your property	
а.	Is there a factor or property manager for your property? If you have answered yes, please provide the name and	No

	address and give details of any deposit held and approximate charges:	
b.	Is there a common buildings insurance policy?	No
	If you have answered yes, is the cost of the insurance included in your monthly/annual factor's charges?	Yes/No/ Don't know
C .	Please give details of any other charges you have to pay on a regular basis for the upkeep of common areas or repair works, e.g. to a Residents' Association, or maintenance or stair fund.	

13.	Specialist Works	
<u>a.</u>	As far as you are aware, has treatment of dry rot, wet rot, damp or any other specialist work ever been carried out to your property?	Yes
	<u>If you have answered yes</u> , please say what the repairs were for, whether you carried out the repairs (and when) or if they were done before you bought the property.	
	We are aware that some work was undertaken to treat some dampness in the 3 rd bedroom some years ago,	

	before our ownership. No recurrence.	
).	As far as you are aware, has any preventative work for dry rot, wet rot, or damp ever been carried out to your property? If you have answered yes, please give details:	Yes
	Please see section 13 (a).	
C.	<u>If you have answered yes</u> to 13(a) or (b), do you have any guarantees relating to this work?	No.
	If you have answered yes, these guarantees will be needed by the purchaser and should be given to your solicitor as soon as possible for checking. If you do not have them yourself <u>please write below who has</u> <u>these documents</u> and your solicitor or estate agent will arrange for them to be obtained. You will also need to provide a description of the work carried out. This may
