HOMES YOU'LL LOVE INSIDE OUT®

A lot of love goes into the building of an Elan home - and it shows. We lavish attention on the beautifully crafted, traditionally styled exterior so that you don't just end up with any new home, but one of outstanding style and real character.

Then, inside, we spread the love a little bit more, by creating highly contemporary living spaces that are simply a pleasure to live in. Every Elan home offers light, airy, high specification, luxury accommodation that has the flexibility to be tailored to the individual wants and needs of you and your family.

What's more, each of our intimate developments are lovingly designed to stand the test of time, so that as they mature and blossom, they become the heart of a close-knit local community.

Which, when you put everything together, all adds up to a fabulous new home that you'll love inside out.

SAVE ANNUALLY WHEN YOU BUY NEW

Statistics from HBF report 2023

- New build houses are so energy efficient they could save buyers up to £183 on their monthly energy bills, compared with the bills of an equivalent older house.
- An average new house emits just 1 third of the amount of carbon that a typical older house emits. Saving 2.8 tonnes of carbon yearly.
- On average, new build homes use approximately 9,414 kWh a year, as compared to older properties using an average of 21,040 kWh annually. Meaning new builds use 55% less energy a year.
- 85% of new builds have an A or B EPC rating. Just 4% of older properties achieve the same energy-efficiency grade.
- Upgrading an older home to modern standards is very costly. Avoid hidden costs and pricey renovation work with an energy-efficient new build.
