# Energy performance certificate (EPC) THE APARTMENT 50 MAIN STREET LONG COMPTON CV36 5JJ Property type Top-floor flat Total floor area Energy rating Valid until: 2 May 2031 Certificate number: 6039-2924-4000-0886-0222

# Rules on letting this property

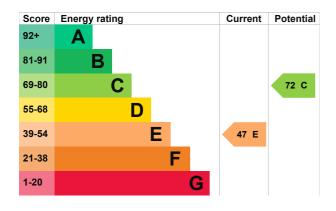

Properties can be let if they have an energy rating from A to E.

You can read <u>guidance</u> for landlords on the <u>regulations</u> and <u>exemptions</u> (<a href="https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance">https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance</a>).

# **Energy rating and score**

This property's energy rating is E. It has the potential to be C.

<u>See how to improve this property's energy efficiency.</u>

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

the average energy rating is D the average energy score is 60

# Breakdown of property's energy performance

# Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

| Feature              | Description   | Rating    |
|----------------------|---|-----------|
| Wall                 | Sandstone or limestone, as built, no insulation (assumed) | Very poor |
| Roof                 | Pitched, 400+ mm loft insulation                          | Very good |
| Roof                 | Roof room(s), ceiling insulated                           | Poor      |
| Window               | Fully double glazed                                       | Good      |
| Main heating         | Electric storage heaters                                  | Average   |
| Main heating control | Controls for high heat retention storage heaters          | Good      |
| Hot water            | Electric immersion, off-peak                              | Average   |
| Lighting             | Low energy lighting in all fixed outlets                  | Very good |
| Floor                | (other premises below)                                    | N/A       |
| Secondary heating    | Room heaters, electric                                    | N/A       |

## Primary energy use

The primary energy use for this property per year is 612 kilowatt hours per square metre (kWh/m2).

### **Additional information**

Additional information about this property:

• Stone walls present, not insulated

# How this affects your energy bills

An average household would need to spend £1,756 per year on heating, hot water and lighting in this property. These costs usually make up the majority of your energy bills.

You could **save £850 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2021** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

# **Heating this property**

Estimated energy needed in this property is:

- 14,601 kWh per year for heating
- 2,156 kWh per year for hot water

# Impact on the environment

This property's environmental impact rating is F. It has the potential to be E.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

### Carbon emissions

An average household produces

6 tonnes of CO2

This property produces 8.9 tonnes of CO2

This property's 4.5 tonnes of CO2
potential production

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

# Changes you could make

| Step                                    | Typical installation cost | Typical yearly saving |
|---|---------------------------|-----------------------|
| 1. Room-in-roof insulation              | £1,500 - £2,700           | £435                  |
| 2. Internal or external wall insulation | £4,000 - £14,000          | £416                  |

### Help paying for energy improvements

You might be able to get a grant from the <u>Boiler Upgrade Scheme (https://www.gov.uk/apply-boiler-upgrade-scheme)</u>. This will help you buy a more efficient, low carbon heating system for this property.

# Who to contact about this certificate

## **Contacting the assessor**

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

| Assessor's name | James Goodman                 |
|-----------------|-------------------------------|
| Telephone       | 07985496105                   |
| Email           | idlovetolivehereltd@gmail.com |

### **Contacting the accreditation scheme**

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.
