### Use this document to:

- Compare current ratings of properties to see which properties are more energy efficient
- Find out how you can save energy and money by installing improvement measures

Estimated energy costs of dwelling for 3 years:	£ 3,804
Over 3 years you could save	£ 210

Estimated energy costs of this home			
	Current costs	Potential costs	Potential future savings
Lighting	£ 363 over 3 years	£ 363 over 3 years	
Heating	£ 2,835 over 3 years	£ 2,835 over 3 years	
Hot Water	£ 606 over 3 years	£ 396 over 3 years	
<b>Totals</b>	<b>£ 3,804</b>	<b>£ 3,594</b>	<b>You could save £ 210 over 3 years</b>

These figures show how much the average household would spend in this property for heating, lighting and hot water and is not based on energy used by individual households. This excludes energy use for running appliances like TVs, computers and cookers, and electricity generated by microgeneration.

### Energy Efficiency Rating

### Actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1 Solar water heating	£4,000 - £8,000	£ 210

#### Situation

This property is quietly situated at the head of Carroway Close which is a cul-de-sac on the sought after Marton Fields Development. It is approached from Martongate via Annerley Drive and taking the first right into Carroway Close. Located on the north side of the town about 2 miles from the town centre with local primary and secondary schools, supermarket and library within about ½ mile and Sewerby cliffs and north beach within about a mile.

#### Description

This unusual detached family house was designed and built for the present owner who wished to incorporate the highest levels of energy efficiency and which includes solar panels, tinted windows for both solar gain and added privacy and in the garden is an air source heat pump which feeds into the hot water system and the underfloor heating system. The house also has a mechanical ventilation heat recovery system to protect against moisture. This system filters the moisture out of warm air in the wet areas in the house, such as bathrooms and gym and feeds it back into the rooms after being filtered and fresh air added. Ideal for allergy sufferers.

Other energy saving technologies throughout the house include over 200 LED downlights, 45M of colour changing strip lights and a hot water tap in place of a kettle. The heating, lighting, MVHR, CCTV and plug socket systems can also be controlled from the owners' smart phone.

There is a rainwater harvesting system in the garden which collects rainwater in a 5000L storage tank and pumps it up into a tank in the roof space. This system feeds all 4 toilets, the washing machine and outside tap and will only take water from the mains supply when there has not been enough rainfall to maintain the system.

VIEWING IS ESSENTIAL TO APPRECIATE THIS PROPERTY.

#### Ground floor

Front entrance door opens into:

#### Entrance Hall

7.4m x 3m (24'3" x 9'10")
