**Completion date of property questionnaire** 6th June 2017

1/6

## SHEPHERD Property Questionnaire

#### **Note for sellers**

- Please complete this form carefully. It is important that your answers are correct.
- The information in your answers will help ensure that the sale of your house goes smoothly. Please answer each question with as much detailed information as you can.
- If anything changes after you fill in this questionnaire but before the date of entry for the sale of your house, tell your solicitor or estate agent immediately.

#### Information to be given to prospective buyer(s)

1.	Length of ownership	
	How long have you owned the property?	43
2.	Council tax	
	Which Council Tax band is your property in?	b
3.	Parking	
	What are the arrangements for parking at your property?	Garage
4.	Conservation area	
	Is your property in a designated Conservation Area (that is an area of special architectural or historical interest, the character or appearance of which it is desirable to preserve or enhance)?	no
5.	Listed buildings	
	Is your property a Listed Building, or contained within one (that is a building recognised and approved as being of special architectural or historical interest)?	no
6.	Alterations/additions/extensions	
a)	(i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet, or bedroom)? If you have answered yes, please describe below the changes which you have made:	#
	(ii) Did you obtain planning permission, building warrant, completion certificate and other consents for this work? If you have answered yes, the relevant documents will be needed by the purchaser and you should give them to your solicitor as soon as possible for checking. If you do not have the documents yourself, please note below who has these documents and your solicitor or estate agent will arrange to obtain them:	#
b)	Have you had replacement windows, doors, patio doors or double glazing installed in your property? If you have answered yes, please answer the three questions below:	yes
	(i) Were the replacements the same shape and type as the ones you replaced?	yes

2/6

## **Property Questionnaire**

	(ii) Did this work involve any changes to the window or door openings?	no
	(iii) Please describe the changes made to the windows doors, or patio doors (with approximate dates when the work was completed): Please give any guarantees which you received for this work to your solicitor or estate agent.	double glazing about 1980
7.	Central heating	
a)	Is there a central heating system in your property? (Note: a partial central heating system is one which does not heat all the main rooms of the property - the main living room, the bedroom(s), the hall and the bathroom).	yes
	If you have answered yes or partial - what kind of central heating is there? (Examples: gas-fired, solid fuel, electric storage heating, gas warm air). If you have answered yes, please answer the three questions below:	gas-fired
	(i) When was your central heating system or partial central heating system installed?	june 2012
	<ul><li>(ii) Do you have a maintenance contract for the central heating system?</li><li>If you have answered yes, please give details of the company with which you have a maintenance contract:</li></ul>	no
8.	Energy Performance Certificate	
	Does your property have an Energy Performance Certificate which is less than 10 years old?	yes
9.	Issues that may have affected your property	
a)	Has there been any storm, flood, fire or other structural damage to your property while you have owned it?	yes
	If you have answered yes, is the damage the subject of any outstanding?	no
b)	Are you aware of the existence of asbestos in your property?	no
10.	Issues that may have affected your property	
a)	Please select which services are connected to your property:	Gas or liquid petroleum gas, Water mains or private water supply, Electricity, Mains drainage
b)	Is there a septic tank system at your property?	no
	(i) Do you have appropriate consents for the discharge from your septic tank?	#
	(ii) Do you have a maintenance contract for your septic tank?	#
11.	Responsibilities for shared or common areas	
a)	Are you aware of any responsibility to contribute to the cost of anything used jointly, such as the repair of a shared drive, private road, boundary, or garden area?	no

## **Property Questionnaire**

b)	Is there a responsibility to contribute to repair and maintenance of the roof, common stairwell or other common areas?	no
c)	Has there been any major repair or replacement of any part of the roof during the time you have owned the property?	#
d)	Do you have the right to walk over any of your neighbours property - for example to put out your rubbish bin or to maintain your boundaries?	no
e)	As far as you are aware, do any of your neighbours have the right to walk over your property, for example to put out their rubbish bin or to maintain their boundaries?	no
f)	As far as you are aware, is there a public right of way across any part of your property? (public right of way is a way over which the public has a right to pass, whether or not the land is privatel-owned.)	no
12.	Charges associated with your property	
a)	Is there a factor or property manager for your property?	no
b)	Is there a common buildings insurance policy?	no
c)	Please give details of any other charges you have to pay on a regular basis for the upkeep of common areas or repair works, for example to a residents' association, or maintenance or stair fund.	
13.	Specialist works	
a)	As far as you are aware, has treatment of dry rot, wet rot, damp or any other specialist work ever been carried out to your property?	no
	If you have answered yes, please say what the repairs were for, whether you carried out the repairs (and when) or if they were done before you bought the property:	
b)	As far as you are aware, has any preventative work for dry rot, wet rot, or damp ever been carried out to your property?	no
14.	Guarantees	
a)	Are there any guarantees or warranties for any of the following:	
i)	Electrical work	yes
ii)	Roofing	dont know
iii)	Central Heating	yes
iv)	National House Building Council (NHBC)	dont know
v)	Damp course	dont know
b)	If you have answered 'yes' or 'with title deeds', please give details of the work or installations to which the guarantee(s) relate(s):	cavity wall installation, loft insulation

#### **Property Questionnaire**

Are there any outstanding claims under any of the guarantees listed above?

#### 15. Boundaries

So far as you are aware, has any boundary of your property been moved in the last 10 years?

5/6

16.	Notices that affect your property In the past three years have you ever rece notice:	ived a		
a)	advising that the owner of a neighbouring proper made a planning application?	erty has	no	
b)	that affects your property in some other way?		no	
c)	that requires you to do any maintenance, repair improvements to your property?	rs or	no	
	If you have answered yes to any of the above, puthe notices to your solicitor or estate agent, including which arrive at any time before the date the purchaser of your property.	luding any		
Declar	ation by the seller(s)/or other authorised bo	dy or persor	n(s)	
$\ensuremath{I}/\ensuremath{We}$ confirm that the information in this form is true and correct to the best of my/our knowledge and belief.			nowledge	
Signature(s)				
Date	•	6th June 201	7	

## **Energy Performance Certificate (EPC)**

**Dwellings** 

**Scotland** 

#### 51 RUTHVEN PLACE, ST ANDREWS, KY16 8SJ

Dwelling type:Detached houseDate of assessment:06 June 2017Date of certificate:06 June 2017Total floor area:93 m²

Total Hool area.

Primary Energy Indicator: 260 kWh/m²/year

**Reference number:** 0170-2146-0160-9703-2665 **Type of assessment:** RdSAP, existing dwelling

Approved Organisation: Elmhurst

Main heating and fuel: Boiler and radiators, mains

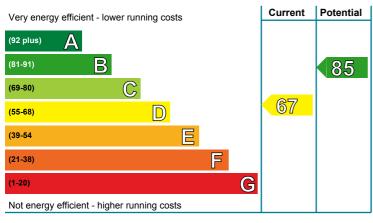

gas

#### You can use this document to:

- . Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO<sub>2</sub> emissions by improving your home

Estimated energy costs for your home for 3 years*	£2,856	See your recommendations	
Over 3 years you could save*	£768	report for more information	

<sup>\*</sup> based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

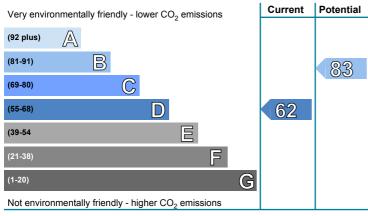

#### **Energy Efficiency Rating**

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band D (67)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

#### **Environmental Impact (CO<sub>2</sub>) Rating**

This graph shows the effect of your home on the environment in terms of carbon dioxide  $(CO_2)$  emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band D (62)**. The average rating for EPCs in Scotland is **band D (59)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

#### Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years	Available with Green Deal
1 Room-in-roof insulation	£1,500 - £2,700	£330.00	<b>⊘</b>
2 Floor insulation (suspended floor)	£800 - £1,200	£282.00	Ø
3 Low energy lighting	£15	£51.00	

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

The Green Deal may allow you to make your home warmer and cheaper to run at no up-front capital cost. See your recommendations report for more details.

THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE

#### Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	Walls Cavity wall, filled cavity		★★★★☆
Roof Pitched, 75 mm loft insulation Pitched, 250 mm loft insulation Roof room(s), insulated		**** **** ***	**** **** ***
Floor	Suspended, no insulation (assumed) To unheated space, no insulation (assumed)	_ _	_ _
Windows	Mostly double glazing	***	***
Main heating	Boiler and radiators, mains gas	****	<b>★★★★</b> ☆
Main heating controls	Programmer, room thermostat and TRVs	****	****
Secondary heating	None	_	_
Hot water	From main system	****	****
Lighting	Low energy lighting in 67% of fixed outlets	****	<b>★★★★</b> ☆

#### The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO<sub>2</sub> emissions, running costs and the savings possible from making improvements.

#### The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 46 kg CO<sub>2</sub>/m<sup>2</sup>/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 4.2 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 2.2 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

#### Estimated energy costs for this home

	Current energy costs	Potential energy costs	Potential future savings
Heating	£2,295 over 3 years	£1,689 over 3 years	
Hot water	£321 over 3 years	£219 over 3 years	You could
Lighting	£240 over 3 years	£180 over 3 years	save £768
Total	s £2,856	£2,088	over 3 years

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

#### **Recommendations for improvement**

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

Recommended measures		Indicative cost	Typical saving Rating after improvement		improvement	Green
Re	commended measures	indicative cost	per year	Energy	Environment	Deal
1	Room-in-roof insulation	£1,500 - £2,700	£110	C 71	D 67	
2	Floor insulation (suspended floor)	£800 - £1,200	£94	C 74	C 72	
3	Low energy lighting for all fixed outlets	£15	£17	C 74	C 72	
4	Solar water heating	£4,000 - £6,000	£35	C 75	C 74	
5	Solar photovoltaic panels, 2.5 kWp	£5,000 - £8,000	£273	B 85	B 83	

Measures which have a green deal tick of are likely to be eligible for Green Deal finance plans based on indicative costs. Subsidy also may be available for some measures, such as solid wall insulation. Additional support may also be available for certain households in receipt of means tested benefits. Measures which have an orange tick may need additional finance. To find out how you could use Green Deal finance to improve your property, visit www.greenerscotland.org or contact the Home Energy Scotland hotline on 0808 808 2282.

#### Choosing the right improvement package

For free and impartial advice on choosing suitable measures for your property, contact the Home Energy Scotland hotline on 0808 808 2282 or go to www.greenerscotland.org.

#### About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

#### 1 Room-in-roof insulation

Insulating roof rooms will significantly reduce heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. If it has a flat ceiling insulation can usually be added above the ceiling, and sloping ceilings and walls of roof rooms can be insulated using an internal lining board. Roof voids must have adequate ventilation to prevent dampness; seek advice about this if unsure. Further information about roof room insulation and details of local contractors can be obtained from the National Insulation Association (www.nationalinsulationassociation.org.uk). Building regulations generally apply to this work so it is best to check this with your local authority building standards department.

#### 2 Floor insulation (suspended floor)

Insulation of a floor will significantly reduce heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. Suspended floors can often be insulated from below but must have adequate ventilation to prevent dampness; seek advice about this if unsure. Further information about floor insulation is available from many sources including www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation. Building regulations generally apply to this work so it is best to check this with your local authority building standards department.

#### 3 Low energy lighting

Replacement of traditional light bulbs with energy saving recommended ones will reduce lighting costs over the lifetime of the bulb, and they last up to 12 times longer than ordinary light bulbs. Also consider selecting low energy light fittings when redecorating; contact the Lighting Association for your nearest stockist of Domestic Energy Efficient Lighting Scheme fittings.

#### 4 Solar water heating

A solar water heating panel, usually fixed to the roof, uses the sun to pre-heat the hot water supply. This can significantly reduce the demand on the heating system to provide hot water and hence save fuel and money. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check these with your local authority. You could be eligible for Renewable Heat Incentive payments which could appreciably increase the savings beyond those shown on your EPC, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

#### 5 Solar photovoltaic (PV) panels

A solar PV system is one which converts light directly into electricity via panels placed on the roof with no waste and no emissions. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check these with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for solar photovoltaic panels, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

#### Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

**LZC energy sources present:** There are none provided for this home

#### Your home's heat demand

You could receive Renewable Heat Incentive (RHI) payments and help reduce carbon emissions by replacing your existing heating system with one that generates renewable heat and, where appropriate, having your loft insulated and cavity walls filled. The estimated energy required for space and water heating will form the basis of the payments. For more information go to www.energysavingtrust.org.uk/scotland/rhi.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	13,968	(189)	N/A	N/A
Water heating (kWh per year)	2,202			

#### **About this document**

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst (www.elmhurstenergy.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Assessor's name:

Address:

Mr. Ewen Sparks

EES/012600

J & E Shepherd

13 Albert Square

Dundee DD1 1XA

Phone number: 01334 477773

Email address: e.sparks@shepherd.co.uk

Related party disclosure: No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

#### Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

#### Opportunity to benefit from a Green Deal on this property

Under a Green Deal, the cost of the improvements is repaid over time via a credit agreement. Repayments are made through a charge added to the electricity bill for the property.

To see which improvements are recommended for this property, please turn to page 3. You can choose which improvements you want to install and ask for a quote from an authorised Green Deal provider. They will organise installation by an authorised Green Deal installer. If you move home, the responsibility for paying the Green Deal charge under the credit agreement passes to the new electricity bill payer.

For householders in receipt of income-related benefits, additional help may be available.

To find out more, visit www.greenerscotland.org or call 0808 808 2282.

Authorised home energy assessment

Finance at no upfront cost

Choose from authorised installers May be paid from savings in energy bills

Repayments stay with the electricity bill payer

## survey report on:

Property address	51 Ruthven Place St Andrews Fife KY16 8SJ	
Customer	Executry of Mrs EK Chandler	
Customer address	c/o Thorntons	
Prepared by	J & E Shepherd	
Date of inspection	6th June 2017	

#### PART 1 - GENERAL

#### 1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property<sup>1</sup>.

If the Surveyors have had a previous business relationship within the past two years with the Seller or Sellers Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

#### 1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

To date, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in the expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

<sup>&</sup>lt;sup>1</sup> Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions. The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

#### 1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to:-

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

#### 1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

#### 1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report <sup>2</sup> will be from information contained in the Report and the generic Mortgage Valuation Report.

<sup>&</sup>lt;sup>2</sup> Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct

#### 1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

#### 1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

#### 1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

#### 1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

#### 1.10 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format;

- the "Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion;
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller:
- a "prospective Purchaser" is anyone considering buying the Property;
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and
- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

#### PART 2 - DESCRIPTION OF THE REPORT

#### 2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

#### 2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

#### 2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- Category 3: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2. Category 2: Repairs or replacement requiring future attention, but estimates are still advised.
- 3. Category 1: No immediate action or repair is needed.

#### **WARNING:**

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

#### 2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

#### 2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

#### 2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

#### 2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value, the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- There are no particularly troublesome or unusual legal restrictions;
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

#### 1. Information and scope of inspection

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities etc. will not be inspected or reported on.

Description	Detached one and a half storey house.
Accommodation	Ground Floor: Hall, Lounge, Dining Kitchen and Porch. First Floor: Landing, Three Bedrooms and Bathroom with WC.
Gross internal floor area (m²)	98.5 sq metres or thereby.
Neighbourhood and location	The property is located within an established residential district on the south-west side of the town approximately one mile from the centre where usual main facilities can be found.
Age	Erected around 1974.
Weather	Dry and bright.
Chimney stacks	None.
Roofing including roof space	Sloping roofs were visually inspected with the aid of binoculars where appropriate.  Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so from a 3m ladder externally.  Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property.  If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so.  The main roof is timber pitched and laid in concrete tiles with lead flashings around and there are flat felt roof coverings at dormer projections to the front and rear.

	Access to the main apex roof void is via a hatch above the landing and there are hatches to eaves voids off the bedrooms.
Rainwater fittings	Visually inspected with the aid of binoculars where appropriate.
	Rainwater fittings are of PVC.
Main walls	Visually inspected with the aid of binoculars where appropriate.
	Foundations and concealed parts were not exposed or inspected.
	Main walls are of cavity brick and roughcast with concrete coping finishes at gable walls. Cavity wall insulation appears to have been injected.
Windows, external doors and joinery	Internal and external doors were opened and closed where keys were available.
	Random windows were opened and closed where possible.
	Doors and windows were not forced open.
	There are aluminium/UPVC framed sealed unit double glazed doors at the front with timber surround and also at the porch to the rear. Windows around the main living accommodation are mostly of aluminium/UPVC design with sealed unit double glazing and partly single glazed timber casement. There are timber facings at the eaves around the edge of the roof and dormers.
External decorations	Visually inspected.
External decorations	There are painted external decorations.
Conservatories / porches	Visually inspected.
	There is a porch to the rear of brick and roughcast construction built on a concrete base and in addition to the aluminium framed double glazed door there are single glazed timber casement windows and a corrugated Perspex roof over.
Communal areas	None.
Garages and permanent outbuildings	Visually inspected.
Caragos and permanent outbuildings	There is a single integral garage with metal vehicular door.
	The second of th

Outside areas and boundaries	Visually inspected.
	Garden grounds have been laid out to the front and rear that are mostly finished in gravel. These are partly open to the front with hedging to one side, there is timber fencing either side of the rear garden and a brick wall to the street where there are metal framed timber vehicular gates.
Ceilings	Visually inspected from floor level.
	Ceilings are of plasterboard.
Internal walls	Visually inspected from floor level.
	Using a moisture meter, walls were randomly tested for dampness where considered appropriate.
	Internal walls appear to be of plastered brick and plasterboard.
Floors including sub floors	Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.
	Floors are of suspended timber with tiles laid in the bathroom.
Internal joinery and kitchen fittings	Built-in cupboards were looked into but no stored items were moved.
	Kitchen units were visually inspected excluding appliances.
	Internal doors are mainly of flush panel type with plain skirtings and facings around. There is a timber and glazed door and an original timber casement window at the rear of the kitchen that now opens onto the porch. There is also a deadlight over the bathroom door.
	There is a timber stair to first floor level with timber railings around and a timber handrail.
	Kitchen fittings comprise base and wall units with some integral appliances and there are fitted cupboards within one of the bedrooms.
Chimney breasts and fireplaces	None.
Internal decorations	Visually inspected.
	There are mostly painted and varnished internal decorations and some papered and tiled finishes.

Cellars	None.	
Electricity	Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.  Mains supply with meter box externally positioned around the front of the garage.	
Gas	Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.	
	Mains supply with meter located within the garage.	
Water, plumbing, bathroom fittings	Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.	
	No tests whatsoever were carried out to the system or appliances.	
	Mains water supply with plumbing of copper and PVC where seen. The mains water stopcock is located in the under stair cupboard.	
	There is a stainless steel sink unit, plumbing for a washing machine and a gas hob in the kitchen.	
	Sanitary fittings comprise a yellow three piece bathroom suite that includes the original boxed in cast iron bath with tiled walls around and screen for protection from a shower fitted above.	
Heating and hot water	Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.	
	No tests whatsoever were carried out to the system or appliances.	
	There is a gas fired central heating system from a combination style boiler located in a cupboard off the landing. This type of boiler provides instantaneous hot water and does not require hot or cold water storage tanks.	
	Additional hot water is provided by an electric shower unit over the bath.	

Drainage	Drainage covers etc. were not lifted.
	Neither drains nor drainage systems were tested.
	Drainage is to the main sewer.

# Fire, smoke and burglar alarms Visually inspected. No tests whatsoever were carried out to the system or appliances. Smoke detectors have been fitted in the hall and landing and there is also a carbon monoxide detector by the boiler cupboard at the landing. The existence or otherwise of a burglar alarm has not been commented on for security reasons.

#### Any additional limits to inspection

Due to the extent of fitted floor coverings throughout our inspection of the property was of a limited nature and virtually no inspection of the upper surface of flooring could be made. No hatches or loose floorboards could be found to allow a sub-floor inspection and no inspection under the bath was possible.

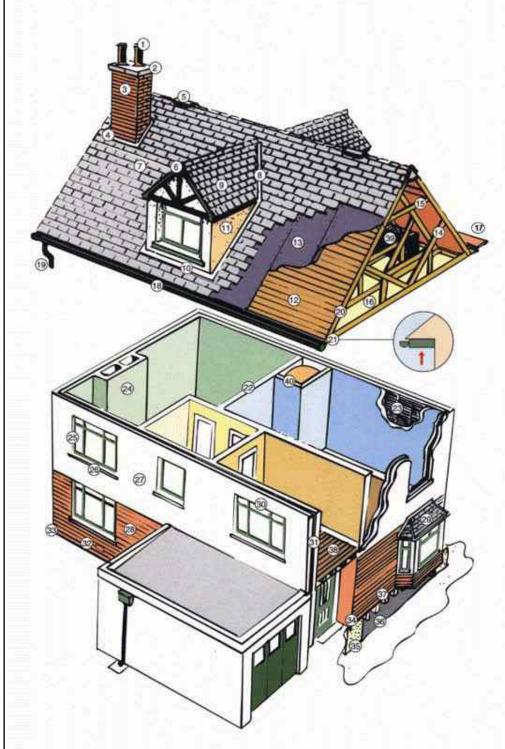

Due to the extent of first floor accommodation within the roof, size of eaves voids and extent of insulation laid over joists, our inspection of roof timbers was limited to what could be seen from around access hatches.

No inspection of flat felt dormer roof coverings could be made.

The circuits and services, including the central heating system, were not tested or checked.

An inspection for Japanese Knotweed was not carried out. This is a plant which is subject to control regulation, is considered to be invasive and one which can render a property unsuitable for some mortgage lenders. It is therefore assumed that there is no Japanese Knotweed within the boundaries of the property or its neighbouring property. Identification of Japanese Knotweed is best undertaken by a specialist contractor.

#### Sectional Diagram showing elements of a typical house

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

- 1) Chimney pots
- 2 Coping stone
- 3) Chimney head
- 4) Flashing
- (5) Ridge ventilation
- 6) Ridge board
- 7) Slates / tiles
- (8) Valley guttering

- 35) Foundations
- 36) Solum
- 37) Floor joists
- 8) Floorboards
- 9) Water tank
- 40) Hot water tank

#### 2. Condition

This section identifies problems and tells you about the urgency of any repairs by using one of the following three categories:

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	

Structural movement	
Repair category	1
Notes	There is some cracking to roughcast below windows which below the lounge window has been filled with mastic sealant. This is thought to be the result of natural settlement occurring early on in the life of the property. While on the basis of our visual inspection no guarantee can be given as to the future, the likelihood of further significant movement occurring would seem to be remote.

Dampness, rot and infestation	
Repair category	2
Notes	There are signs of leakage around the front dormer evidenced from the eaves attic hatch and by damp staining at the lounge ceiling below. While there is no staining below in the dining area, signs of leakage were also noted around the edge of the roof to the rear within the eaves roof void.  There are also signs of leakage evidenced by damaged plaster and staining to brickwork around the side of the garage by the entrance door.  There is staining to a bedroom wall adjacent to the bath and the ceiling of the dining kitchen below also appears to have been affected by leakage but has been painted over. The affected areas were found to be dry although the bathroom does not appear to have been used in recent times.  Our inspection of floor and roof timbers was of a very limited nature although evidence of woodworm was noted affecting a joist around the hatch to the apex roof void. The extent of woodworm infestation could not be confirmed.

Chimney stacks	
Repair category	-
Notes	None.

Roofing including roof space	
Repair category	2
Notes	There are some areas of worn, damaged and missing mortar pointing below ridge tiles and some cracked and loose mortar pointing was noted at the verge around the front corner of the roof and below concrete coping around the edge of the roof elsewhere. There is also some scattered moss growth to roof tiles. There are signs of leakage around the edge of the roof and front dormer projection.  No inspection of flat felt dormer roof coverings could be made. While no evidence of failure was apparent internally it should be stressed that this type of roof covering generally does have only a limited life and requires above average maintenance.  Insulation within accessible roof voids is thin by modern standards and missing in places where seen in eaves voids.

Rainwater fittings	
Repair category	2
Notes	Guttering is uneven in places, particularly at the rear, and some vegetation growth was noted in guttering around the top of a down pipe at the front.

Main walls	
Repair category	2
Notes	There is some cracking to roughcast, particularly at the front south most corner of the house.

Windows, external doors and joinery	
Repair category	2
Notes	There is decay to timber fascia boarding in several places at the eaves and around dormer projections.

External decorations	
Repair category	2
Notes	External paintwork is weathered and flaking in places and plastic finishes are flaking around rear windows.

Conservatories/porches	
Repair category	2
Notes	Window woodwork shows signs of decay in places and decoration is weathered and flaking.

Communal areas	
Repair category	-
Notes	None.

Garages and permanent outbuildings	
Repair category	2
Notes	Cracked and bossed roughcast was noted around the front of the garage and internally there is cracking to the ceiling plaster finish as well as some damage due to roof leakage.  The garage door mechanism appears to be broken necessitating the use of a padlock to secure this garage.

Outside areas and boundaries	
Repair category	1
Notes	Damage was noted to some timber fencing in places around the rear.

Ceilings	
Repair category	1
Notes	Some plaster cracks were noted affecting ceilings but this is not uncommonly found in properties of this age and type.

Internal walls	
Repair category	1
Notes	Some cracking was noted in corners and around door and window openings but again this is not uncommonly found in properties of this age and type and is not thought to be of any serious structural significance.

Floors including sub-floors	
Repair category	1
Notes	No immediate action or repair needed.

Internal joinery and kitchen fittings	
Repair category	1
Notes	No immediate action or repair needed.

Chimney breasts and fireplaces	
Repair category	-
Notes	None.

Internal decorations	
Repair category	1
Notes	There is some staining in places due to dampness.

Cellars	
Repair category	-
Notes	None.

Electricity	
Repair category	2
Notes	Electrical fittings, while having seen a degree of upgrading, are of mixed style/age and there do appear to be only a limited number of sockets in some rooms.  The electricity meter box door is off its hinges.

Gas	
Repair category	1
Notes	No immediate action or repair needed.

Water, plumbing and bathroom fittings				
Repair category	2			
Notes	There are gaps at the mastic seal around the edge of the bath and also some gaps in grout between tiles around the shower area. Evidence of possible leakage was noted to the ceiling of the kitchen below. Failure of seals can result in dampness/decay to adjoining/underlying areas.  There is no extractor fan in the bathroom.			

Heating and hot water				
Repair category	1			
Notes	No immediate action or repair needed.			

Drainage	
Repair category	1
Notes	No immediate action or repair needed.

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the previous comments for detailed information.

Structural movement	1
Dampness, rot and infestation	2
Chimney stacks	-
Roofing including roof space	2
Rainwater fittings	2
Main walls	2
Windows, external doors and joinery	2
External decorations	2
Conservatories/porches	2
Communal areas	-
Garages and permanent outbuildings	2
Outside areas and boundaries	1
Ceilings	1
Internal walls	1
Floors including sub-floors	1
Internal joinery and kitchen fittings	1
Chimney breasts and fireplaces	-
Internal decorations	1
Cellars	-
Electricity	2
Gas	1
Water, plumbing and bathroom fittings	2
Heating and hot water	1
Drainage	1

#### **Category 3**

Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

#### Category 2

Repairs or replacement requiring future attention, but estimates are still advised.

#### Category 1

No immediate action or repair is needed.

#### Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

#### Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

#### 3. Accessibility information

#### Guidance notes on accessibility information

Three steps or fewer to a main entrance door of the property:

In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

#### Unrestricted parking within 25 metres:

For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin-operated machines.

1. Which floor(s) is the living accommodation on?	Ground and first
2. Are there three steps or fewer to a main entrance door of the property?	Yes X No
3. Is there a lift to the main entrance door of the property?	Yes No X
4. Are all door openings greater than 750mm?	Yes No X
5. Is there a toilet on the same level as the living room and kitchen?	Yes No X
6. Is there a toilet on the same level as a bedroom?	Yes X No
7. Are all rooms on the same level with no internal steps or stairs?	Yes No X
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	Yes X No

#### 4. Valuation and conveyancer issues

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated reinstatement cost for insurance purposes.

#### Matters for a solicitor or licensed conveyancer

Where defects or repairs have been identified within this report it is recommended that, prior to entering into any legally binding sale or purchase contract, further specialist or contractors advice and estimates should be obtained, to establish the implications, if any, on a potential offer to purchase or the sale price likely to be achieved for the property.

There do not appear to have been any significant alterations carried out to this property in recent times. The porch does seem to be of some age and is of a type for which that is unlikely to have required consent.

Possible asbestos based materials were noted in the construction of the property including cement sheet panels supporting projecting tile work at verges around the edge of the roof and possibly at soffit boarding and ceiling panels below the projecting first floor bedroom that extends over the garage. The current informed view is if left undisturbed this should pose no significant hazard to health.

The road and footpath adjoining the site are made up and are assumed to be adopted by the Local Authority.

#### Estimated reinstatement cost for insurance purposes

For Reinstatement Cost Assessment purposes, it is recommended that the subjects be insured for a sum of not less than £210,000 (TWO HUNDRED AND TEN THOUSAND POUNDS).

#### Valuation and market comments

Having considered matters, taking account of our general observations on site, we are of the opinion that the current market value of the subjects in their present condition and with the benefit of full vacant possession may be fairly stated in the capital sum of £265,000,000 (TWO HUNDRED AND SIXTY-FIVE THOUSAND POUNDS).

#### **General Remarks**

The property is located within an established residential district on the south-west side of the town approximately one mile from the centre where usual main facilities can be found.

The property appears to have been adequately maintained having regard to its age and character and no evidence of serious structural defect was noted. While there is some cracking to roughcast this is thought to be the result of natural settlement occurring early on in the life of the property. The likelihood of further significant movement occurring would seem to be remote.

Our inspection of floor and roof timbers was of a very limited nature although evidence of woodworm was noted within the roof space and there are signs of possible leakage around the edge of the roof and front dormer as well as around the bath. This should be investigated further by a timber specialist and roofing contractors and repairs carried out as necessary.

Other defects noted are mainly of a relatively minor nature and should mostly be capable of remedy in the course of maintenance, redecoration and further upgrading that may well be envisaged by a new owner.

No inspection of flat felt dormer roof coverings could be made. While no evidence of failure was apparent internally it should be stressed that this type of roof covering generally does have only a limited life and requires above average maintenance.

\*Other accommodation: Porch.
